

Safer Redbridge Strategy

The Redbridge Community Safety Partnership has responded to the clear message from residents and businesses that lowering crime is paramount to making Redbridge a good place to live, work and visit, and are confident that the priorities in this Plan reflect this.

This Safer Redbridge Strategy identifies five key priorities that all statutory and voluntary organisations within the partnership agree to focus their resources on, working collaboratively to maximise the effect we can have as a collective body. Each of the priorities listed have associated delivery mechanisms and dynamic action plans to drive them forward. The priorities established in 2020 will be reviewed annually to ensure that they continue to address the most pressing crime and disorder issues in the Borough. If priorities are changed in the future this document will be updated to reflect them.

Establishing the Priorities

The following criteria have been used to set the Partnership priorities in Redbridge for the period of this strategy:

- a) **Collective partnership impact:** Areas of work where the Partnership is best placed to have the largest cooperative impact because of the amount of cross cutting, coordinated, partnership work involved.
- b) **Impact on victims:** Some crimes have a more significant impact on a victim than others. For example, the differing impact of shoplifting or criminal damage compared to that of residential burglary or domestic violence are hugely contrasting for a victim.
- c) **Quality of life for local Residents:** Local surveys and national research have been used to ensure priorities are focused on problems that have the largest impact on residents' general quality of life.
- d) **Tackling crime and disorder priorities** identified through detailed crime analysis.
- e) **Ensuring strong links and local delivery of Mayor's Office for Policing and Crime (MOPAC) Police and Crime Plan**

SAFER REDBRIDGE

SAFEGUARDING FROM RADICALISATION

- Work with the Business Improvement District
- Work with businesses through specific crime reduction groups such as Business Watch and Bet Watch
- Introduce a multi-agency team including joint tasking and patrols
- Ensure that area redevelopment work includes location based crime reduction solutions
- Maintain and monitor PSPD
- Introduce zero tolerance approach to street drinking
- Target and disrupt organised begging groups
- Target and disrupt illegal street gambling
- Ensure rough sleepers are referred and supported

Working together
Tackling anti-social behaviour and responding to social issues

Environmental Issues

- Commission additional litter enforcement presence in the town centre
- Improve the cleanliness of the area through increased cleaning resources
- Implement a rolling deep clean programme for town centre
- Work with businesses to ensure commercial waste is dealt with correctly

ILFORD TOWN CENTRE
