

London Borough of Redbridge Local and National Planning Application Requirement List – Updated January 2024

# National Requirements – In line with the Town and Country Planning (Development Management Procedure) (ENG) Order 2015

#### Summary tables (these should be used as a guide only)

#### National list

Validation Requirement:	Applications which require this:
Completed Application Form	All
Ownership and Agricultural	All
Holdings Certificate	
Design and Access Statement	Major applications; listed building consents; applications for one or more new residential units; and applications
(DAS)	where the floor space created is 100sqm or more within a conservation area.
Site Location Plan	All
Block Plan	All
Floor Plans	All
Elevations	All applications – excluding applications for changes of use with no external changes.
Roof Plans	All applications that involve changes to roofs or are for new buildings.
Sections and Site Levels	All major applications.
Fire Statement	All applications providing, modifying, or in the curtilage of, a residential or educational accommodation building that is 7 storeys and/or 18 metres in height or greater.
Appropriate Fee	All

## Local list

Validation Requirement:	Applications which require this:		
Affordable Housing Statement	All major applications proposing residential uses of 10 or more units or 1000m <sup>2</sup> of residential floorspace.		
Affordable and Managed Workspace Management Plan	All major applications for office or mixed-use development including commercial floorspace.		
Air Quality Assessment (AQA)	All major applications.		
Air Quality Positive Statement	Major developments which are referable to the Mayor of London under the following categories: Category 1A, Category 1B, Category 2C(1)(a)-(f), Category 2C(2), Category 2C(3), Category 2D.  These include developments with a total floorspace over 15,000m <sup>2</sup> ; over 150 residential units; sites that are subject to EIAs.		
Arboriculture Impact Statement/Tree Survey	All applications where trees within or adjacent to the site may be affected by the development.		
Archaeological Assessment	All applications within Archaeological Priority Areas likely to affect important archaeological remains.  All applications that involve any form of excavation or piling within an Archaeological Priority Area.  GLAAS requirement tiers 1-4.		
Basement Impact Assessment or Construction Method Statement for Basements	All applications that involve basement development.		
BREEAM Assessment BREEAM (Pre-Assessment)	All non-residential major applications (non-major developments are encouraged to meet these standards).		
(Energy) BREEAM Domestic Refurbishment Scheme (Energy)	Applicants should submit BREEAM pre-assessment as appropriate to demonstrate how the proposed development will achieve the necessary credits for final certification of the required level.		
CIL Application Forms	All applications where a new dwelling is created, and/or where 100sqm of new gross internal floor space (GIA) is created.		
Circular Economy Statement	All major applications referable to the GLA/Mayor of London.		

Validation Requirement:	Applications which require this:		
Community Use Statement	Where there is an application which includes the loss of a community use.		
Construction Logistics and Management Plan (CMP)	All major applications.		
Contaminated Land Report	All applications with a sensitive end use and on land with high risk of potential contamination in view of the nature of the former use at the site.		
Ecological and Biodiversity Assessment	All major applications where site is on or adjacent to designated local wildlife sites (LWS) (both statutory and non-statutory), rivers, brownfield and open space, and/or where protected species may be in the locality.		
Environmental Impact Assessment	EIA is a National Statutory Requirement and the applicant should consult The Town and Country Planning (Environmental Impact Assessment) Regulations 2017 and National Planning Practice Guidance as to whether their proposals meet the thresholds for Schedule 1 or Schedule 2 Development.  An EIA is required for all Schedule 1 Development. For Schedule 2 Development – A Local Planning Authority can determine if EIA is required via a screening process and, if required, a scoping opinion is also discretionary, but recommended, to focus on the topics to be covered in the EIA and the mitigation to be		
offered for any significant environmental impacts.  All major applications where there is a planning policy requirement that is not met within the development (ie the development provides under 35% affordable housing, or under 50% affordable housing for development on public/industrial land) or where the affordable housing is not a between affordable rented and intermediate tenures at rents set by the London Plan SPG.			
Fire Statement	All major applications.		
Flood Risk Assessment (FRA)	<ul> <li>Site-specific Flood Risk Assessments for all new developments that meet the following criteria:</li> <li>1) Sites of one hectare or greater in Flood Zone 1 (low probability);</li> <li>2) All new development (including minor development and changes of use) in Flood Zones 2 (medium probability) and Flood Zone 3 (high probability);</li> <li>3) Land within Flood Zone 1 which has critical drainage problems (as notified by the Environment Agency);</li> <li>4) Land identified within the Council's Strategic Flood Risk Assessment and/or Environment Agency as being subject to surface water flooding;</li> </ul>		

Validation Requirement:	Applications which require this:
	5) Sites that fall within an area identified in the Council's Strategic Flood Risk Assessment (SFRA) Level 1 and Level 2
	6) Development within Flood Zone 3 which introduces a sensitive or more vulnerable end use
	7) Within flood zone 1 where the SFRA shows it will be at risk of flooding from rivers or the sea in future
	8) That increases the vulnerability classification and is in flood zone 1
Flues and Vents Assessment	All applications where the installation of plant, flues, ventilation, extraction or air conditioning equipment is proposed.
Green Infrastructure Assessment	All major applications.
including Urban Greening Factor	
Hard/Soft Landscaping Plan	All major applications.
Health Impact Assessment	All major applications of 150+ dwellings.
Heritage Statement	All applications that directly affect, or affect the setting of, a statutory listed building; affect the setting of a non-designated heritage asset (locally listed building); or are in a conservation area.
Houses in Multiple Occupation (HMO) Management Plan	All applications for conversions/changes of use to HMOs.
Lighting Assessment	All major applications which contain external lighting; all applications which include, or are for, floodlighting.
Noise Assessment	If your proposal is for a noise sensitive development and is adjoining an existing noise source (upper floor of a pub/night club/industrial site/railway line) or your proposal has the potential to generate noise.
Open Space, Sport, and Recreation Assessment	All applications for proposals affecting designated Green Belt, Metropolitan Open Land or playing pitches.
Planning Statement	All major applications.
Retail Impact Assessment or Statement	All major applications for retail uses as set out in the Local Plan.
S106 – Draft Heads of Terms	Draft heads of terms to be submitted to the Council for all major applications.
Statement of Community Involvement	All major applications.
Student Housing Report	All applications that relate to, or involve, the development of student accommodation.

Validation Requirement:	Applications which require this:
Sustainable Drainage Systems (SuDS)	Required for:
Strategy	All major applications.
	All new developments that meet the following criteria:
	1. Sites of one hectare or greater in Flood Zone 1 (low probability).
	2. All new development (including minor development and changes of use) in Flood Zones 2 (medium probability) and Flood Zone 3 (high probability).
	3. Land within Flood Zone 1 which has critical drainage problems (as notified by the Environment Agency).
	4. Land identified within the Council's Strategic Flood Risk Assessment and/or Environment Agency as being subject to <b>surface water flooding</b> .
	5. Sites that fall within an area identified in the Council's Strategic Flood Risk Assessment (SFRA) Level 1 and Level 2.
	6. Development within Flood Zone 3 which introduces a sensitive or more vulnerable end use
	7. Within flood zone 1 where the SFRA shows it will be at risk of flooding from rivers or the sea in future.
	8. That increases the vulnerability classification and is in flood zone 1.
	9. All developments creating or extending basements, in areas of flood risk (zones 1, 2 and 3) and/or surface water drainage in flood risk areas.
	10. All developments proposing a more vulnerable or higher end use.
Sustainable Drainage Systems (SuDS)	All new developments meeting the following criteria:
Proforma	<ol> <li>Sites of one hectare or greater in Flood Zone 1 (low probability);</li> </ol>
	2. All new development (including minor development and changes of use) in Flood Zones 2 (medium probability) and Flood Zone 3 (high probability).
	3. Land within Flood Zone 1 which has critical drainage problems (as notified by the Environment Agency).
	4. Land identified within the Council's Strategic Flood Risk Assessment and/or Environment Agency
	as being subject to surface water flooding.
	<ol><li>Sites that fall within an area identified in the Council's Strategic Flood Risk Assessment (SFRA)</li><li>Level 1 and Level 2.</li></ol>
	6. Development within Flood Zone 3 which introduces a sensitive or more vulnerable end use.

Validation Requirement:	Applications which require this:
	7. Within flood zone 1 where the SFRA shows it will be at risk of flooding from rivers or the sea in
	future.
	8. That increases the vulnerability classification and is in flood zone 1.
	9. All developments creating or extending basements, in areas of flood risk (zones 1, 2 and 3) and/or
	surface water drainage in flood risk areas.
	10. All developments proposing a more vulnerable or higher end use.
Tall Buildings Impact Assessment	All major applications of 18m and above, and/or greater than 6 storeys.
	Non major applications should look to guidance in the day light/sun light requirements.
Transport Impact Assessment and	All major applications.
Green Travel Plan (inclusive of Parking	A Transport Impact Assessment and a Travel Plan should be submitted alongside non-major planning
Survey and Transport Statement)	applications which are likely to have significant transport implications.
Waste/Site Waste Management	All major and non-major applications for change of use and creation of new residential units.
Plan/Service Delivery Plan	
Whole life-cycle carbon assessment (WLCA)	All major applications referable to the GLA/Mayor of London.

## **Detail of requirements (Inc Climate Impact Assessment table)**

## **National Requirements**

Validation Requirement:	Applications which require this:	What information is required:	Relevant Policy:	Guidance Information:
Completed Application Form	All	Completed Application Form – All necessary and required elements of the application form filled in,	National Planning Policy Framework <a href="https://www.gov.uk/government/">https://www.gov.uk/government/</a>	National Planning Policy Guidance - Making an Application: <a href="https://www.gov.uk/guidance/makin">https://www.gov.uk/guidance/makin</a>
		correctly.	publications/national-planning- policy-framework2	g-an-application
Ownership and Agricultural Holdings Certificate	All	Under the 1990 Town and Country Planning Act (read in conjunction with Article 7 of the General Development Procedure Order 1995) all applications for planning permission must be accompanied by the relevant certificates concerning the ownership of the application site. Please ensure you have completed the Ownership Certificate (A, B, C or D as applicable), (except for advertisement consent only applications), and the declaration. Ensure you sign and date each of these sections —	National Planning Policy Framework https://www.gov.uk/government/ publications/national-planning- policy-framework2	National Planning Policy Guidance – Before Submission: https://www.gov.uk/guidance/before -submitting-an-application  Making an Application: https://www.gov.uk/guidance/makin g-an-application  When Permission is Required: https://www.gov.uk/guidance/when- is-permission-required  Determining an Application: https://www.gov.uk/guidance/deter mining-a-planning-application

Validation Requirement:	Applications which require this:	What information is required:	Relevant Policy:	Guidance Information:
Requirement.	require tins.	otherwise, your application will be invalid.  For a certificate an 'owner' is anyone with a freehold interest or a leasehold interest the unexpired term of which is not less than 7 years. Certificate A must be completed when the applicant is the sole owner of the site.  Certificate B must be completed when all the owner(s) of the site are known. If Certificate B has been completed notice must be served on all the owners of the site in question. Certificate C must be completed when some of the owners of the site are known but not all. Certificate D must be completed when none of the owners of the site are known.  The Agricultural Holdings  Certificate is required whether or not the site includes an agricultural		
		holding.		
Design and Access Statement (DAS)	Major applications; listed building consents; applications for one or more new residential units; and applications	Report to illustrate the process that has led to the finally submitted development proposal, explaining the approach, justification, and detail of the design, and to describe the standards of accessibility that	National Planning Policy Framework https://www.gov.uk/government/ publications/national-planning- policy-framework2	Design and Access Statement: - Planning Portal Guidance: https://www.planningportal.co.uk/fa qs/faq/51/what_is_a_design_and_ac cess_statement

Validation Requirement:	Applications which require this:	What information is required:	Relevant Policy:	Guidance Information:
	where the floor space created is 100sqm or more within a conservation area.	would be designed into the development, such as M4(2) and M4(3).  An inclusive design statement should be included within the Design and Access Statement or as a separate document, demonstrating how developments are designed for all, including allowing independent access for disabled users and suitable means of emergency escape.	For Inclusive Design London Plan Policy: D5	
Site Location Plan	All	Up to date map at a scale of 1:1250 or 1:2500. Application site boundary must be clearly edged with a red line & include all land required for the proposed development. Any other land within the control or ownership of the applicant, that is adjacent or close to the application site, should be edged with a blue line.  Also required: An arrow indicating the direction of North, and at least two surrounding named roads.	National Planning Policy Framework https://www.gov.uk/government/ publications/national-planning- policy-framework2	National Planning Policy Guidance – Before Submission: https://www.gov.uk/guidance/before -submitting-an-application  Making an Application: https://www.gov.uk/guidance/makin g-an-application  When Permission is Required: https://www.gov.uk/guidance/when- is-permission-required  Determining an Application: https://www.gov.uk/guidance/deter mining-a-planning-application

Validation Requirement:	Applications which require this:	What information is required:	Relevant Policy:	Guidance Information:
Block Plan	All	A site plan at a scale of either 1:200 or 1:500 accurately showing; direction of north, proposed development in relation to the site boundaries and other existing buildings on site, all neighbouring buildings, roads and footpaths on land adjoining the site including access arrangements and all public rights of way crossing or adjoining the site.	https://www.gov.uk/government/publications/national-planning-policy-framework2	National Planning Policy Guidance – Before Submission: https://www.gov.uk/guidance/before -submitting-an-application  Making an Application: https://www.gov.uk/guidance/makin g-an-application  When Permission is Required: https://www.gov.uk/guidance/when- is-permission-required  Determining an Application: https://www.gov.uk/guidance/deter mining-a-planning-application
Floor Plans	All	Drawings at a scale of 1:50/1:100 /1:200 showing floorplans of the existing building(s) & the proposed building(s), identifying each relevant floor/part floor, roof, and means of access. Where possible, please show existing and proposed floor plans next to each other. Where existing buildings or walls are to be demolished, these must be clearly shown. The proposed plans should be shown in context with the site boundary and any existing adjacent buildings. Applications for change	https://www.gov.uk/government/publications/national-planning-policy-framework2	National Planning Policy Guidance – Before Submission: https://www.gov.uk/guidance/before -submitting-an-application  Making an Application: https://www.gov.uk/guidance/makin g-an-application  When Permission is Required: https://www.gov.uk/guidance/when- is-permission-required  Determining an Application:

Validation Requirement:	Applications which require this:	What information is required:	Relevant Policy:	Guidance Information:
		of use need to be accompanied by floor plans annotated where helpful to indicate the extent of the existing and proposed use within the land or building.		https://www.gov.uk/guidance/deter mining-a-planning-application
Elevations	All applications – excluding applications for changes of use with no external changes.	Drawings at a scale of 1:50/1:100/1:200, illustrating all relevant external parts. Where possible, please show existing and proposed elevations next to each other.  Where a proposed elevation adjoins another building, or is in close proximity, the drawing should clearly show the relationship between the buildings & detail the relative positions of openings, parapets, levels etc. on each property.  Blank elevations (e.g. end elevations which are blank) should also be included for clarity.	https://www.gov.uk/government/publications/national-planning-policy-framework2	National Planning Policy Guidance – Before Submission: https://www.gov.uk/guidance/before -submitting-an-application  Making an Application: https://www.gov.uk/guidance/makin g-an-application  When Permission is Required: https://www.gov.uk/guidance/when- is-permission-required  Determining an Application: https://www.gov.uk/guidance/deter mining-a-planning-application
Roof Plans	All applications that involve changes to roofs or are for new buildings.	To show shape and materials of roofs at scale of 1:50/1:100/1:200.	https://www.gov.uk/government/publications/national-planning-policy-framework2	National Planning Policy Guidance – Before Submission: <a href="https://www.gov.uk/guidance/before-submitting-an-application">https://www.gov.uk/guidance/before-submitting-an-application</a> Making an Application: <a href="https://www.gov.uk/guidance/making-an-application">https://www.gov.uk/guidance/making-an-application</a>

Validation Requirement:	Applications which require this:	What information is required:	Relevant Policy:	Guidance Information:
Sections and Site Levels	All major applications.	Drawings at a scale of 1:50/1:100/1:200 showing cross-sections through the proposed buildings containing details of existing site levels, and finished floor levels with the levels related to a fixed datum point offsite, and showing the proposals in relation to adjoining buildings. Use spot levels and cross/long sections as necessary. Annotation may be very useful.	https://www.gov.uk/government/publications/national-planning-policy-framework2	When Permission is Required: https://www.gov.uk/guidance/when- is-permission-required  Determining an Application: https://www.gov.uk/guidance/deter mining-a-planning-application  National Planning Policy Guidance — Before Submission: https://www.gov.uk/guidance/before -submitting-an-application  Making an Application: https://www.gov.uk/guidance/makin g-an-application  When Permission is Required: https://www.gov.uk/guidance/when- is-permission-required  Determining an Application: https://www.gov.uk/guidance/deter mining-a-planning-application
Fire Statement	National requirement:  All applications (made on or after 1 August 2021) providing,	National requirement:  Fire statements must be submitted on a form published by the Secretary of State (or a form to similar effect) (see Annex C) and contain the particulars specified	This forms Building Safety: Planning Gateway One <a href="https://www.gov.uk/guidance/building-safety-planning-gateway-one">https://www.gov.uk/guidance/building-safety-planning-gateway-one</a>	Templates for the national Fire Statement requirements are available here: <a href="https://www.gov.uk/government/publications/planning-application-">https://www.gov.uk/government/publications/planning-application-</a>

Validation Requirement:	Applications which require this:	What information is required:	Relevant Policy:	Guidance Information:
Requirement.	modifying, or in the curtilage of, a residential or educational accommodation building that is 7 storeys and/or 18 metres in height or greater.	or referred to in the form, which includes information about (not exhaustive list):  • the principles, concepts and approach relating to fire safety that have been applied to each building in the development • the site layout • emergency vehicle access and water supplies for firefighting purposes • what, if any, consultation has been undertaken on issues relating to the fire safety of the development; and what account has been taken of this • how any policies relating to fire safety in relevant local development documents have been taken into account.  NB: You may need to submit		forms-templates-for-local-planning-authorities  Applicants should ensure they meet the requirements of both national requirements and London Plan policies in their Fire Statement.  The focus of this statement is on fire safety so far as it is relevant to land use planning.  Exception regarding Fire Statement under paragraph 6: <a href="https://www.legislation.gov.uk/uksi/2021/746/article/4/made">https://www.legislation.gov.uk/uksi/2021/746/article/4/made</a> Further guidance: <a href="https://www.gov.uk/guidance/fire-safety-and-high-rise-residential-buildings-from-1-august-2021">https://www.gov.uk/guidance/fire-safety-and-high-rise-residential-buildings-from-1-august-2021</a>

		Planning Portal.		

<sup>\*</sup>Please note that these are national requirements and are essential for the validation and timely processing of your application. Please seek additional guidance from the Council via our pre-application advice services (<a href="https://www.redbridge.gov.uk/planning-and-building/planning/">https://www.redbridge.gov.uk/planning-and-building/planning/</a>). Alternatively, you can contact a private planning consultant to advise you (<a href="https://www.rtpiconsultants.co.uk/#/">https://www.rtpiconsultants.co.uk/#/</a>).

<sup>\*</sup>All drawings must clearly be labelled as proposed or existing (or existing and pre-existing for retrospective applications). Applications will be made invalid for incorrectly labelled plans.

<sup>\*</sup>All plans must be submitted as separate single page PDF files. Other document types, or multiple page combined PDF files, will not be accepted. All other submitted documents should also be in PDF format. Applications will be made invalid for incorrectly formatted plans/documents.

<sup>\*</sup>All drawings must state the scale and/or include a scale bar showing lengths of 1m and 10m.

<sup>\*</sup>Administration and other charges may be applicable to your application. These are required for validation and are detailed online - these are separate to the statutory application fee (<a href="https://www.redbridge.gov.uk/planning-and-building/details-of-fees-and-charges/">https://www.redbridge.gov.uk/planning-and-building/details-of-fees-and-charges/</a>).

<sup>\*</sup>Administration charges (£220 for major applications, £132 for non-major commercial/new residential unit applications, £66 for all other applications) will be applied on invalidation of an application. These charges are a set amount, and we will not consider alterations to these, unless in exceptional circumstances. This charge will also be removed from any refund if an invalid application is withdrawn pre-validation.

## **Local Requirements**

Validation Requirement:	Applications which require this:	What information is required:	Relevant Policy:	Guidance
Affordable Housing Statement	All major applications proposing residential uses of 10 or more units or 1000m² of residential floorspace.	To enable the LPA to understand how many affordable rented and intermediate homes are being provided, which flats are allocated for each type of affordable home, what Registered Provider (RP) is to manage them and at what rents they will be charged including service charges.  The wheelchair units (10% overall) that are affordable under Standard M4(3) of the Building regulations should be shown as "accessible" (ie fully fitted out) from the outset and "adaptable" (capable of being fitted out at a later stage) if provided in the market housing.  A net gain approach is applied. This requirement does not apply to an existing block of flats.	Local Plan Policy: LP 3 – Affordable Housing  See also: LP5  London Plan H4, H6  Please also see NPPF, where relevant.	Mayor of London's Affordable Housing and viability SPG: https://www.london.gov.uk/w hat-we- do/planning/implementing- london-plan/london-plan- guidance-and-spgs/affordable- housing-and-viability- supplementary-planning- guidance-spg

Validation Requirement:	Applications which require this:	What information is required:	Relevant Policy:	Guidance
Affordable and Managed Workspace Management Plan	All major applications for office or mixed-use development including commercial floorspace.	Prior to first occupation of the development, the Owners shall submit a Management Plan for approval in writing by the Local Planning Authority. The Management Plan shall demonstrate how the managed floorspace within the building will operate in accordance with the principles set out in Policies LP 15 and LP 16, and the corresponding supporting text in the Local Plan.  Note: Major residential developments with a small proportion of commercial development does not trigger this requirement.	Local Plan Policy: LP 15 – Managed Workspace,  London Plan: E1, E2, E3, E5, E8, E11  Please also see NPPF, where relevant.	
Air Quality Assessment (AQA)	All major applications.	All applications which require an AQA should be supported by such information as is necessary to allow a full consideration of the impact of the proposal on the air quality of the area and the impact of existing air quality on the proposed development.	Local Plan Policy: LP 24 – Pollution  London Plan: SI 1  London Mayor's Sustainable Design and Construction SPG  London Mayor's Control of Dust and Emissions during	NPPG: Air Quality https://www.gov.uk/guidance /air-quality3  NPPG: Open Spaces (for reference only) https://www.gov.uk/guidance /open-space-sports-and-recreation-facilities-public-

	2C(1)(a)-(f), Category 2C(2),	referable to the Mayor under		
	Category 2C(3), Category 2D.	the following categories:		
	These include developments	Category 1A • Category 1B •		
	with a total floorspace over	Category 2C(1)(a)-(f) •		
	15,000m <sup>2</sup> ; over 150 residential	Category 2C(2) • Category		
	units; sites that are subject to	2C(3) • Category 2D.		
	EIAs.			
		In summary, these include		
		developments that are over		
		150 residential units; total		
		floorspace of more than		
		15,000m <sup>2</sup> ; sites that are		
		subject to EIAs; development		
		providing aircraft runway,		
		heliport, air passenger		
		terminal, railway station or		
		tram station, tramways,		
		railway, cable car, bus or		
		coach station; development		
		for the storage of buses or		
		coaches; certain waste		
		development.		
		The AQP statement should be		
		submitted as part of the EIA		
		either alongside or as an		
		appendix to the		
		Environmental Statement and		
		updated for reserved matters.		

Validation Requirement:	Applications which require this:	What information is required:	Relevant Policy:	Guidance
		An AQP Statement should be		
		submitted that demonstrates		
		how benefits to local air		
		quality have been maximised,		
		and how measures to		
		minimise pollution exposure		
		will be implemented. It needs		
		to consider these measures:		
		better design and reducing		
		exposure; building emissions;		
		transport emissions;		
		innovation and		
		futureproofing. The AQP		
		Statement must demonstrate		
		how all aspects of a		
		development – including the		
		buildings, public spaces,		
		landscaping and infrastructure		
		<ul> <li>will lead to beneficial</li> </ul>		
		outcomes for air quality. It		
		must meet the minimum		
		requirements of London Policy		
		SI 1.		
		It is recommended to		
		complete the air quality		
		positive matrix as in Appendix		
		2 of the Air Quality Positive		
		London Plan Guidance.		

Validation Requirement:	Applications which require this:	What information is required:	Relevant Policy:	Guidance
Arboriculture Impact Statement/Tree Survey	All applications where trees within or adjacent to the site may be affected by the development.	This information should be prepared by a qualified arboriculturalist to British Standard BS 5837:2012, Trees in relation to design, demolition and construction.  It should include: Arboriculture report, tree survey/classification, tree protection plan and method statement.  London Plan Policy G7 Trees and Woodlands necessitates the removal of trees there should be adequate replacement based on the existing value of the benefits of the trees removed, determined by, for example, i-tree or CAVAT or another appropriate valuation system.	Local Plan Policy: LP38 – Protecting Trees and Enhancing the Landscape See also: LP 31 London Plan: G5, G6, G7  Please also see NPPF, where relevant. 		Electrical (M&E) landscape		
		drawings with specification		
		A biodiversity net gain		
		approach should be applied:		
		Where the benefits of the		
		development proposal clearly		
		outweigh the impacts on		
		biodiversity, the following		
		mitigation hierarchy should be		
		applied to minimise		
		development impacts: 1)		
		avoid damaging the significant		
		ecological features of the site		
		2) minimise the overall spatial		
		impact and mitigate it by		
		improving the quality or		
		management of the rest of the		
		site		
		3) deliver off-site		
		compensation of better		
		biodiversity value.		
		Developers may complete and		
		submit the latest version of		
		Natural England's Biodiversity		
		metric tool (currently 4.0) to		
		support their Ecological and		
		Biodiversity Assessment		
		showing net gain.		

Validation Requirement:	Applications which require this:	What information is required:	Relevant Policy:	Guidance
Environmental Impact Assessment	EIA is a National Statutory Requirement and the applicant should consult The Town and Country Planning (Environmental Impact Assessment) Regulations 2017 and National Planning Practice Guidance as to whether their proposals meet the thresholds for Schedule 1 or Schedule 2 Development.  An EIA is required for all Schedule 1 Development. For Schedule 2 Development – A Local Planning Authority can determine if EIA is required via a screening process and, if required, a scoping opinion is also discretionary, but recommended, to focus on the topics to be covered in the EIA and the mitigation to be offered for any significant environmental impacts.	Requirements will vary according to the site context and specific development proposals – it would be very rare for an application involving an EIA to be submitted without a thorough preapplication discussion, and particular requirements should be identified in that process. Where an EIA is required, Schedule 4 to the regulations sets out the information that should be included in an Environmental Statement.	Local Plan Policy: LP 18 -25  Please also see NPPF, where relevant.	NPPG: EIA https://www.gov.uk/guidance /environmental-impact- assessment
Financial Viability Assessment	All major applications where there is a planning policy requirement that is not met	The assessment should include a full Viability report, which will be published by the	Local Plan Policy: LP 41 – Delivery and Monitoring,	NPPG: Viability <a href="https://www.gov.uk/guidance">https://www.gov.uk/guidance</a> /viability

Validation Requirement:	Applications which require this:	What information is required:	Relevant Policy:	Guidance
	within the development (ie the development provides under 35% affordable housing, or under 50% affordable housing for development on public/industrial land) or where the affordable housing is not a 60/40% split between affordable rented and intermediate tenures at rents set by the London Plan SPG.	Council, and an executive summary, this will also be published. The reports should be written in plain English. It is encouraged that affordable housing viability is fully assessed and discussed at preapplication stage.  Written confirmation that the agent will fund for this to be independently assessed will also be submitted to the Council.  Any element of the report	See also: LP 3, LP 15, LP 16, & LP 20  London Plan: H4, H5, DF1  Please also see NPPF, where relevant. 		building will take into account		
		and not compromise the base		
		build fire safety/protection		
		measures.		
		Paragraph 3.12.9 of Policy D12		
		explains that Fire Statements		
		should be produced by		
		someone who is:		
		"third-party independent and		
		suitably-qualified"		
		It goes onto explain:		
		"This should be a qualified		
		engineer with relevant		
		experience in fire safety, such		
		as a chartered engineer		
		registered with the		
		Engineering Council by the		
		Institution of Fire Engineers,		
		or suitably qualified and		
		competent professional with		
		the demonstrable experience		
		to address the complexity of		
		the design being proposed.		
		This should be evidenced in		
		the fire statement."		
		A Fire Statement should only		
		be produced by a competent		

Validation Requirement:	Applications which require this:	What information is required:	Relevant Policy:	Guidance
		professional. Typically, such a		
		person will be a fire engineer		
		with the ability to		
		demonstrate knowledge and		
		experience relevant to the		
		complexity of the		
		development proposed.		
		Evidence of competency of		
		the author of the Fire		
		Statement should be detailed		
		in a clearly identified section		
		at the beginning of the Fire		
		Statement, and should		
		demonstrate that the author		
		meets the following criteria:		
		a) is a registered fire engineer		
		with the Engineering Council		
		with the post-nominals IEng		
		(Incorporated Engineer) or		
		CEng (Chartered Engineer)		
		after their name, and is		
		registered with the Institute		
		of Fire Engineers with the post		
		nominals MIFireE after their		
		name		
		b) clearly details evidence of		
		suitable training, skills,		
		experience, knowledge and		
		behaviours (relevant to the		
		development in question)		

Validation Requirement:	Applications which require this:	What information is required:	Relevant Policy:	Guidance
		indicating the author's ability		
		to write the Fire Statement.		
		NB: <b>You may need to</b>		
		submit both a Fire		
		statement form using the		
		template on the gov.uk		
		website, as well as a		
		separate statement to		
		demonstrate compliance		
		with the London Plan		
		requirements.		
		<u> </u>

S106 – Draft Heads of Terms	Draft heads of terms to be submitted to the Council for all major applications.	The draft heads of terms should set out the areas into which the applicant and the Council will agree on, whereby payments may have to be made. This should be discussed at pre-application advice meetings.	Local Plan Policy: LP 41 – Delivery and Monitoring,  See also: LP 3, LP 15, LP 16, & LP 20  London Plan: H4 – H7, DF1  Please also see NPPF, where relevant.	NPPG: Obligations https://www.gov.uk/guidance /planning-obligations  LBR Planning Obligations SPD https://www.redbridge.gov.uk /media/9278/planning- obligations-spd-2019.pdf

Validation Requirement:	Applications which require this:	What information is required:	Relevant Policy:	Guidance
Statement of Community Involvement	All major applications.	All major applications need to be supported by a statement setting out how the applicant has complied with the requirements for preapplication consultation set out in the local planning authority's adopted statement of community involvement and demonstrating that the views of the local community have been sought and taken into account in the formulation of development proposals.  The SCI should provide details of community engagement, meetings etc. and the outcomes of this e.g. Where it was held, on how many occasions, times, dates, photographs, questionnaires, level of response, number of attendees.  The SCI should also demonstrate how the scheme has changed due to engagement. This should be set out in a clear and concise way.	Local Plan Policy: LP 41 — Delivery and Monitoring  See also: Redbridge Statement of Community Involvement (December 2020)  Please also see NPPF, where relevant.	NPPG: Consultation https://www.gov.uk/guidance /consultation-and-pre- decision-matters  Redbridge Statement of Community Involvement: https://www.redbridge.gov.uk /media/8890/redbridge-sci- 2020.pdf

Validation requirement:	Applications which require this:	What information is required:	Policy relating to requirements	Guidance:
Student Housing Report	All applications that relate to, or involve, the development of student accommodation.	The Student Housing Report should include a Student Management Plan, and how the development is linked to an educational institution, as per Local Plan Policy LP 4. The Management Plan should include a Code of Conduct to ensure safety and a prevention of anti-social behaviour.	Local Plan Policy: LP4 – Specialist Accommodati on, & LP 5 – Dwelling Mix London Plan: H15 Please also see NPPF, where relevant.	NPPG: Housing https://www.gov.uk/guidance /housing-and-economic-land- availability-assessment
Tall Buildings Impact Assessment	All major applications of 18m and above, and/or greater than 6 storeys.  Non major applications should look to guidance in the day light/sun light requirements.	The Assessment should include the variety of impacts a tall building will have on the surrounding area. The assessment should include an urban design analysis, as per LP 27, and follow the criteria set out in LP 26. Other important elements to consider include, but not confined to, the following:   • Visual Impact using realistic visualisations from ground level from key points in the vicinity of the area at far, medium and nearby distances  • Physical Impact  • Daylight/Sunlight Report and impact from glare  • Transport/Movement Strategy	Local Plan Policy: LP 27 – Tall Buildings  See also LP26, LP29, LP 32)  London Plan: D9  Please also see NPPF, where relevant.	NPPG: Design https://www.gov.uk/guidance /design

Validation requirement:	Applications which require this:	What information is required:	Policy relating to requirements	Guidance:
		<ul> <li>Microclimate (wind levels at ground floor level)</li> <li>Any other associated impact (site dependant)</li> </ul>		
Transport Impact Assessment and Green Travel Plan (inclusive of Parking Survey and Transport Statement)	All major applications. A Transport Impact Assessment and a Travel Plan should be submitted alongside non-major planning applications which are likely to have significant transport implications.	The coverage and detail of the Transport Impact Assessment and Travel Plan should reflect the scale of the development and the extent of the transport implications of the proposal. It should look at the design process and the impact on the existing network, as well as any mitigation measures needed. The Travel Plan should promote a modal shift and encourage sustainable modes of transport.  Major applications will also require a Construction Logistics Plan to demonstrate how trips will be managed.  Major developments should be designed to encourage and facilitate active travel with convenient and inclusive pedestrian and cycling routes, crowing points, cycle parking, and legible entrances to buildings, that are aligned with peoples' movement patterns and desire lines in the area. Designs should reduce the dominance of cars.  Designs should support TfL's Healthy Streets Approach.	Local Plan Policy: LP 22- Promoting Sustainable Transport, & LP 23 – Cycling and Car Parking  London Plan: GG3, D2, D3, D8  London Transport Strategy, London Freight Plan.  Please also see NPPF, where relevant. Waste/Site Waste Management Plan/Service Delivery Plan	All major and non-major applications for change of use and creation of new residential units.	The appropriate arrangements and/or space for the storage and collection of recycling and refuse, and to ensure that the premises can be adequately serviced (i.e.	Local Plan Policy: LP 24 – Pollution, & LP 22 –	NPPG: Waste https://www.gov.uk/guidance/waste

Validation Applications which requirement: this:	ire What information is required:	Policy relating to requirements	Guidance:
	A service and delivery plan) Details to be included on the site plan and/or address them as part of the application. This should include:  • The location of loading and unloading • The hours of loading and unloading • The frequency and size of vehicles • Swept paths • Allocated areas for general (200 litres per flat) and recyclable waste (30 litres per flat) streams with accommodation for growth of waste stream (ie electrical waste) • Separate areas for non residential waste if a mixed use scheme that may get collected privately • Travel distances from Refuse Collection Vehicles (RCVs) to unloading areas (not more than 25m dragging distance within the site or not more than 10m for no more than two eurobins if on public highway) • How there will be private management to ensure Eurobins are presented at the site boundary for collection by LB Redbridge RCVs • Provision of dropped kerbs on the highways for this purpose • Wheelie bins – to be informed by new internal guidance from Civic Pride	Promoting Sustainable Transport  London Plan: SI 7, SI 8  Please also see NPPF, where relevant.	East London Waste Plan (2012) https://eastlondonwaste.gov. uk/minutes/jwdp.pdf

	C	limate Impact Assessment		
Validation requirement:	Applications which require this:	What information is required:	Policy relating to requirements	Guidance:
BREEAM Assessment: BREEAM (Pre- Assessment) (Energy)  BREEAM Domestic Refurbishment Scheme (Energy)	All non-residential major applications (non-major developments are encouraged to meet these standards).  Applicants should submit BREEAM pre-assessment as appropriate to demonstrate how the proposed development will achieve the necessary credits for final certification of the required level.	For both: A BREEAM assessment certified by an accredited assessor is required for non-residential, as set out in LP 32, which establishes the sustainability performance of buildings to strive for an 'excellent' rating. These include the refurbishment of non domestic buildings, new non domestic buildings over 1000sqm in size, and extensions to non domestic buildings where the proposed extension is equal to or greater than 50% of the existing floor space. Initial design SBEM calculation, technical details of proposed system(s), saving calculation following approved method summarised in an Energy Statement, as required by the London Plan. If not viable to undertake to this standard a statement explaining the implications will be required.	Local Plan Policy: LP32 – Sustainable Design and Construction  London Plan: Chapter 9  Please also see NPPF, where relevant.	NPPG: Energy https://www.gov.uk/guidance /renewable-and-low-carbon- energy
Flood Risk Assessment (FRA)	Site-specific Flood Risk Assessments for all new developments that meet the following criteria:  1) Sites of one hectare or greater in Flood Zone 1 (low probability).  2) All new development (including minor development and changes of use) in Flood Zones 2 (medium probability) and Flood Zone 3 (high probability).	The FRA should contain information as detailed in the latest Environment Agency, government guidance, National Planning Policy Framework (NPPF) and National Planning Policy Guidance (NPPG).  The assessment should demonstrate how flood risk will be managed now and over the development's lifetime, taking climate change into account, and with regard to the vulnerability of its users	Local Plan Policy: LP 21 – Water and Flooding  London Plan: SI 12, SI 13  The Environment Agency	NPPG: Flood Risk https://www.gov.uk/guidance /flood-risk-and-coastal-change Definition of Major development  Major development means the following: (a)the winning and working of minerals or the use of land for mineral-working deposits;

	C	limate Impact Assessment		
Validation requirement:	Applications which require this:	What information is required:	Policy relating to requirements	Guidance:
	<ol> <li>Land within Flood Zone 1 which has critical drainage problems (as notified by the Environment Agency).</li> <li>Land identified within the Council's Strategic Flood Risk Assessment and/or Environment Agency as being subject to surface water flooding.</li> <li>Sites that fall within an area identified in the Council's Strategic Flood Risk Assessment (SFRA) Level 1 and Level 2.</li> <li>Development within Flood Zone 3 which introduces a sensitive or more vulnerable end use.</li> <li>Within flood zone 1 where the SFRA shows it will be at risk of flooding from rivers or the sea in future.</li> <li>That increases the vulnerability classification and is in flood zone 1.</li> </ol>	(see National Planning Policy Framework Annex 3 – Flood Risk Vulnerability.  What to include in your assessment  For all developments the FRA should include:  • an assessment of the flood risk from all sources of flooding for your development, plus an allowance for climate change  • the estimated flood level for your development, taking into account the impacts of climate change over its lifetime  • details of the finished floor levels  • details of your flood resistance, resilience and emergency plans  • any supporting plans and drawings  • any other information the relevant Environment Agency standing advice tells you to include  The estimated flood level is the depth of flooding anticipated on your development site in a:  • river flood with a 1 in 100 annual probability plus an allowance for climate change  • tidal flood with a 1 in 200 annual probability plus an allowance for climate change  If flood defences are present, the estimated flood level should account for the residual flood risk if they breached or overtopped.	website also provides detailed maps on flood risk.  Please also see NPPF, where relevant.	(b)waste development; (c)the provision of dwellinghouses where— (i)the number of dwellinghouses to be provided is 10 or more; or (ii)the development is to be carried out on a site having an area of 0.5 hectares or more and it is not known whether the development falls within sub-paragraph (c)(i); (d)the provision of a building or buildings where the floor space to be created by the development is 1,000 square metres or more; or (e)development carried out on a site having an area of 1 hectare or more  Definition of non-major development  Non-major development is any development falling below the major development threshold but excluding minor

		Climate Impact Assessment		
Validation requirement:	Applications which require this:	What information is required:	Policy relating to requirements	Guidance:
		<ul> <li>The objectives of a site-specific flood risk assessment are to establish: <ul> <li>whether a proposed development is likely to be affected by current or future flooding from any source;</li> <li>whether it will increase flood risk elsewhere;</li> <li>whether the measures proposed to deal with these effects and risks are appropriate;</li> <li>the evidence for the local planning authority to apply (if necessary) the Sequential Test, and;</li> <li>whether the development will be safe and pass the Exception Test, if applicable.</li> </ul> </li> <li>Please provide the information as set out in the NPPG Site-specific flood risk assessment Checklist</li> </ul>	requirements	development. For example, a planning application for 8 dwellings an office building creating 750 square metres of floor space, or a development with a site area of 0.4 hectares.  Definition of minor development  Minor development means:  • minor non-residential extensions (industrial/commercial/lei ure etc): extensions with a floorest area of the same and the same area of the same area.
		<ul> <li>For minor development:         <ul> <li>As a minimum, the assessment needs to show that the development will be safe for its users for the intended lifetime of the development, without increasing flood risk elsewhere, and be sufficiently flood resistant and resilient to the level and nature of the flood risk.</li> <li>Use the Environment Agency's Standing Advice and you may use the appropriate products or packages of information from</li> </ul> </li> </ul>		floorspace not in excess of 250 square metres.  alterations: development that does not increase the size of buildings, e.g. alterations to external appearance.  householder development: for example, sheds, garages, games rooms etc. within the curtilage of the existing

		Climate Impact Assessment		
Validation requirement:	Applications which require this:	What information is required:	Policy relating to requirements	Guidance:
		the Environment Agency to help you complete your flood risk assessment: Flood risk assessments if you're applying for planning permission - GOV.UK (www.gov.uk)  You should follow the Environment Agency's standing advice if you're carrying out a flood risk assessment of a development classed as:  • a minor extension (household extensions or non-domestic extensions less than 250 square metres) in flood zone 2 or 3  • 'more vulnerable' in flood zone 2 (except for landfill or waste facility sites, caravan or camping sites)  • 'less vulnerable' in flood zone 2 (except for agriculture and forestry, waste treatment, mineral processing, and water and sewage treatment)  • 'water compatible' in flood zone 2  You also need to follow standing advice for developments involving a change of use into one of these vulnerable categories or into the water	requirements	dwelling, in addition to physical extensions to the existing dwelling itself. This definition excludes any proposed development that would create a separate dwelling within the curtilage of the existing dwelling (e.g. subdivision of houses into flats) or any other development with a purpose not incidental to the enjoyment of the dwelling.  Further National Guidance: <a href="https://www.gov.uk/guidance/flood-risk-assessment-for-planning-applications">https://www.gov.uk/guidance/flood-risk-assessment-for-planning-applications</a> NPPG Site-specific flood risk assessment: Checklist: Flood risk and coastal change -

Validation requirement:	Applications which require this:	What information is required:	Policy relating to requirements	Guidance:
		includes notifying the Council that energy data has been submitted to the GLA in line with be seen. The outputs generated from SAP/SBEM software should be attached to this document to justify the findings.  A minimum on-site reduction of at least 35 per cent beyond Building Regulations is required for major development. This should be demonstrated through the submission of a completed GLA carbon emissions spreadsheet. The SAP calculation outputs should be appended to the sustainability document. Residential development should achieve 10 per cent, and non-residential development should achieve 15 per cent through energy efficiency measures. Where it is clearly demonstrated that the zero-carbon target cannot be fully achieved on-site, any shortfall should be provided, in agreement with the borough through a cash in lieu contribution to the borough's carbon offset fund.		
		Details of the carbon offset calculation will be required using guidance and templates provided by the GLA.  Major development proposals outside Heat Network Priority Areas should select a low-carbon heating system that is appropriate to the heat demand of		

Climate Impact Assessment				
Validation requirement:	Applications which require this:	What information is required:	Policy relating to requirements	Guidance:
		peak demand, as with heat networks, and avoids high energy bills for occupants.		
		The Energy Assessment should be easy to read and understand. It should include clear data tables, and comply with the requirements set out in the various policies.		
		<ul> <li>To include the following topics;</li> <li>Managing heat risk using the cooling hierarchy as outlined in London Plan Policy SI 4.</li> <li>Cooling and use of passive ventilation to minimise energy use;</li> <li>Mitigation measures</li> <li>Design to minimise energy use otherwise (ie orientation and materials, variation in window size and landscaping); and</li> <li>Use of renewable energy (eg photovoltaic, solar thermal, geothermal)</li> <li>District heating connection assessment if development is located within District Heating Network Priority Area</li> <li>The requirements stated in paragraph 9.2.12 of the London Plan</li> <li>The heat source for communal heating systems should follow the heating hierarchy as detailed in</li> </ul>		

Climate Impact Assessment					
Validation requirement:	Applications which require this:	What information is required:	Policy relating to requirements	Guidance:	
		Conclusions and recommendations of the assessment should remove or mitigate negative impacts on the climate or to enhance positive.  The assessment should provide details to monitor the impacts on the climate and enhance existing evidence bases.			
Whole life-cycle carbon assessment (WLCA)	All major applications referable to the GLA/ Mayor of London.	A completed WLCA assessment spreadsheet should be submitted as well as the associated document.  The Whole life-cycle carbon assessment should contain information on the estimated emissions, actions taken to reduce whole life-cycle carbon emissions, opportunities to further reduce the developments WLC emissions, assumption for maintenance, repair, replacement.  Developers should use the guidance and templates provided by the GLA in the Mayor of London's Whole life-cycle Carbon assessments Guidance.  To fully capture a development's carbon impact, a whole life-cycle approach is needed to capture its unregulated emissions, its embodied emissions and emissions associated with maintenance, repair and replacement as well as dismantling, demolition and eventual material disposal.	London Plan Policy SI2	Mayor of London's WLCA guidance: https://www.london.gov.uk/what-we-do/planning/implementing-london-plan/london-plan-guidance/whole-life-cycle-carbon-assessments-guidance	

\*During the assessment of an application, a case officer may require additional information which does not appear on this list. This information will be essential for the timely determination of your application. If this information is not forthcoming, the Council may agree to an extension of time with the applicant/agent, or, should no agreement be reached, refuse the scheme due to the lack of the aforementioned appropriate information.
