

Research Update

2011 Census – Key Statistics tables and Quick Statistics tables Ward and Lower Super Output Area level

Produced by the Corporate Policy and Performance Team

Contacts	Tony Doherty x 82144
	Jimmy Maravala x 82112

Based on ONS data released on 30th January 2013

Introduction

As the second phase of the [second release of 2011 Census statistics](#) the [Office for National Statistics](#) (ONS) has now published:

- 35 Key Statistics tables for wards and output areas (*summary figures, presented as both numbers and percentages, to allow comparison across different areas*).
- 70 Quick Statistics tables for wards and output areas (*refer to one variable and its response categories from a census question*).
- Data at ward and lower layer super output area level (*geographic area containing circa 1,500 people*) is now available for the first time on topics such as ethnicity, religion, health, household composition and economic activity.

This briefing focuses on country of birth, main language, ethnicity and religion and, where possible, compares Redbridge data against 2001 Census data and/or the London average. The briefing also sets out links to more detailed data sets and a schedule of future data releases. As this briefing refers to percentages of the total population on a number of pages, actual numbers (*and analysis*) of total population is also included on page 3.

Due to small population size, City of London is not included in any London average calculations, or in London rankings. This leaves a total of 32 London Boroughs and 624 London wards in the ranking scale. Nationally there are 8,562 wards.

Key findings

The identity of people living in the wards of Redbridge has changed between the 2001 and 2011 censuses. In 2001, three out of every five Redbridge residents were White and one in five was Asian/Asian British, nearly four in five had been born in the UK and one in two was a Christian with one in five being a Muslim. By 2011 this had changed to two out of every five being White and two in five being Asian/Asian British, nearly three in five had been born in the UK and nearly two in five were a Christian with two in five being a Muslim and one in the same five being a Hindu. In 2011:

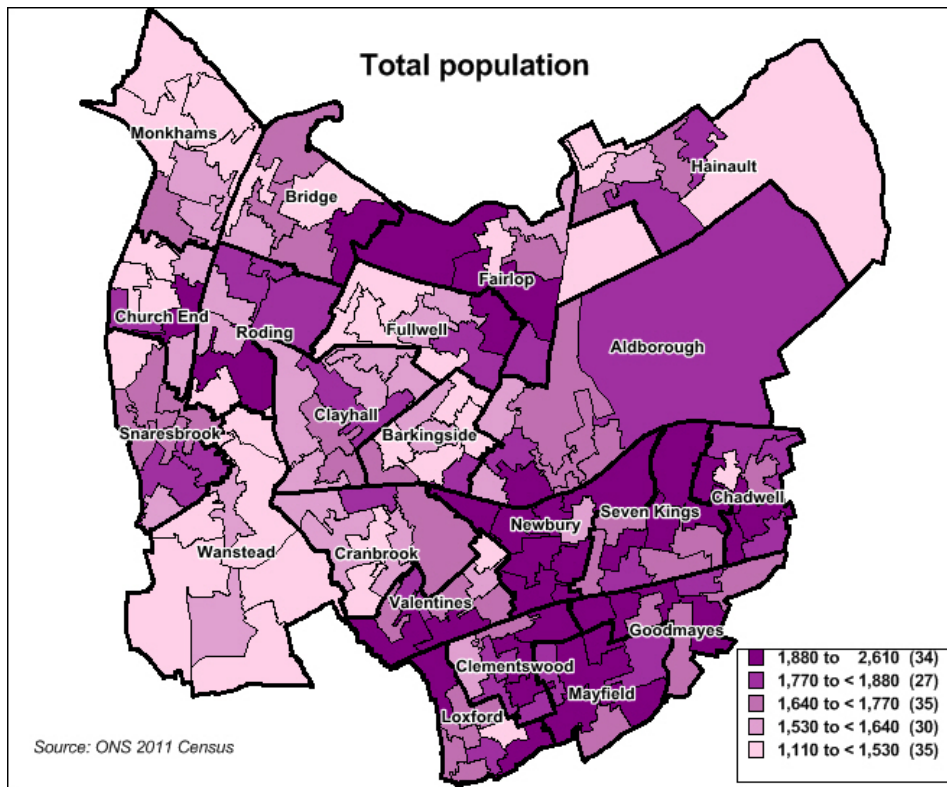

- Clementswood had the highest proportion of residents born outside of the UK (55.6%), followed by Loxford.
- Clementswood had the lowest proportion of residents aged 3 and over with English as their main language (57.4%), followed by Loxford.
- Clementswood, Cranbrook, Goodmayes, Loxford, Newbury, Seven Kings and Valentines were all in the highest one per cent of wards in England and Wales for the proportion of BME residents - they were all also in the top ten per cent of wards in London.
- The resident population of Clementswood, Clayhall, Cranbrook, Loxford and Valentines consisted of more than sixty per cent of Asian/Asian British people.
- Cranbrook featured in the highest one per cent of all wards in England and Wales for the proportion of Muslims (at 36.6%, while Loxford was highest in Redbridge at 46.0%), the proportion of Hindus (at 12.6%, while Clayhall was highest in Redbridge at 21.5%) and the proportion of Jewish people (at 4.8%, while Barkingside was highest in Redbridge at 10.5%). In total, Redbridge had four wards in the highest one per cent of all wards in England and Wales for the proportion of Muslims, nine wards for the proportion of Hindus and eight wards for the proportion of Jewish people.

Total population

The Redbridge population was 278,970, an increase of 17% since 2001.

Redbridge has a higher growth rate than the London average - every ward in Redbridge recorded some growth between the censuses. Clementswood had the highest growth rate, followed by Chadwell, Newbury and Seven Kings. Wanstead had by far the lowest growth rate. The table to the right provides a breakdown of the change in each ward.

The map below shows the total population in Redbridge at lower super output area (LSOA) level.

Ward	2001	2011	Change
Aldborough	11,611	14,544	25.3%
Barkingside	11,303	12,609	11.6%
Bridge	11,211	11,658	4.0%
Chadwell	11,030	14,257	29.3%
Church End	9,997	11,516	15.2%
Clayhall	11,855	13,241	11.7%
Clementswood	11,286	14,666	29.9%
Cranbrook	11,858	12,780	7.8%
Fairlop	10,420	12,630	21.2%
Fullwell	11,269	12,910	14.6%
Goodmayes	10,994	13,069	18.9%
Hainault	11,367	12,953	14.0%
Loxford	13,585	16,544	21.8%
Mayfield	11,226	13,672	21.8%
Monkhams	9,866	10,422	5.6%
Newbury	13,074	16,760	28.2%
Roding	10,770	12,044	11.8%
Seven Kings	11,910	15,164	27.3%
Snaresbrook	10,854	11,865	9.3%
Valentines	11,643	14,123	21.3%
Wanstead	11,506	11,543	0.3%
REDBRIDGE AVERAGE	11,364	13,284	16.9%
LONDON AVERAGE	11,482	13,087	14.0%

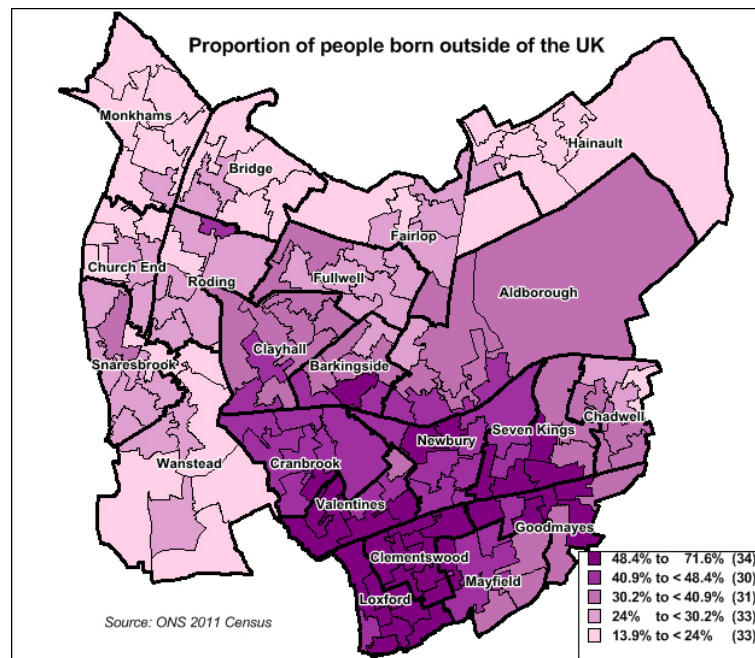

Country of birth

The country of birth question included responses for each of the four parts of the UK, one for the Republic of Ireland, and one for 'Elsewhere'. Where a person ticked 'Elsewhere', they were asked to write in the current name of the country in which they were born. Countries that are grouped under the EU are those that were members in 2011.

In 2011, just over a third of Redbridge residents were born outside of the UK – this was similar to the London average and an increase on 2001 when almost a quarter of residents were born outside of the UK. Clementswood (55.6%) had the highest proportion of residents born outside of the UK, followed by Loxford. Monkham's (18.8%) had the lowest proportion of residents born outside of the UK, followed by Bridge. The table to the right provides a breakdown of the change in each ward – *please note, percentages may not sum due to rounding.*

The map below shows the proportion of residents in Redbridge born outside of the UK at lower super output area (LSOA) level.

In 2011, the most frequent countries of birth of Redbridge residents born outside the UK were India (7.6%), Pakistan (5.3%), Sri Lanka (2.6%) and Bangladesh (2.6%). India (4.9%) and Pakistan (2.6%) were the most frequent countries of birth of Redbridge residents in 2001 along with Republic of Ireland (1.7%) and Kenya (1.6%)

WARD	2001	2011	% Change
Aldborough	22.1%	38.4%	16.3%
Barkingside	24.7%	40.5%	15.7%
Bridge	12.8%	21.6%	8.8%
Chadwell	13.6%	31.6%	18.1%
Church End	14.8%	22.1%	7.3%
Clayhall	24.8%	38.8%	14.0%
Clementswood	43.5%	55.6%	12.0%
Cranbrook	33.4%	44.5%	11.1%
Fairlop	12.7%	25.1%	12.4%
Fullwell	16.0%	29.6%	13.6%
Goodmayes	32.1%	46.3%	14.2%
Hainault	9.0%	22.2%	13.2%
Loxford	41.1%	53.2%	12.1%
Mayfield	27.8%	41.1%	13.3%
Monkhams	12.7%	18.8%	6.1%
Newbury	35.0%	47.5%	12.6%
Roding	17.0%	28.2%	11.2%
Seven Kings	33.2%	47.6%	14.4%
Snaresbrook	17.3%	27.2%	9.9%
Valentines	38.9%	50.3%	11.4%
Wanstead	16.1%	22.8%	6.7%
REDBRIDGE AVERAGE	24.2%	36.9%	12.7%
LONDON AVERAGE	27.1%	36.7%	9.6%

Main language and proficiency in English

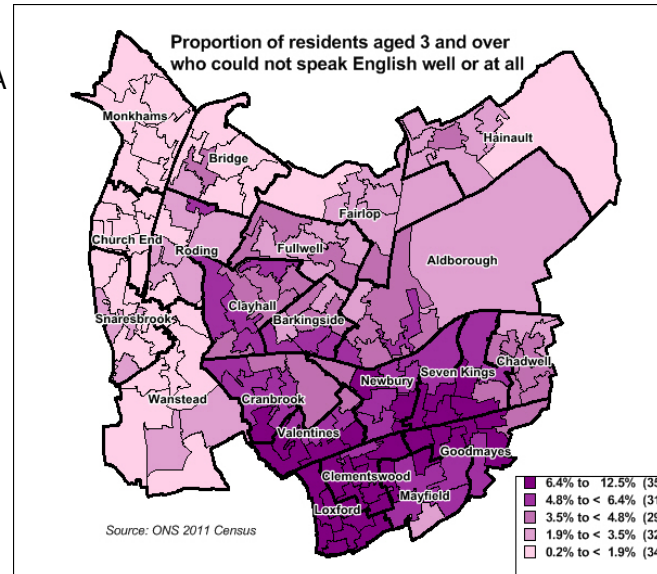

The 2011 Census was the first to collect information on language. Three quarters (75.4%) of Redbridge residents aged 3 and over spoke English as their main language. This was slightly lower than the London average (77.9%) and significantly lower than England and Wales (92%).

3.9% of Redbridge residents aged 3 and over, had a main language other than English and could not speak English well, and 0.7% could not speak English at all – this is very similar to the averages for London.

Clementswood (57.4%) had the lowest proportion of residents aged 3 and over with English as their main language, followed by Loxford. Clementswood, Goodmayes and Loxford had the highest proportion of residents with a main language other than English who could not speak English at all. The table to the right provides a breakdown in each ward of the proportion of residents aged 3 and over whose main language was English and the proportions that could not speak English well or at all.

The three foremost languages spoken in Redbridge as a first language, after English, were Urdu (3.8%), Panjabi (3.1%), and Tamil (2.6%). In London they were Polish (1.9%), Bengali with Sylheti and Chatgaya (1.5%) and Gujarati (1.3%). Nationally they were Polish (1%), Panjabi (0.5%) and Urdu (0.5%).

The map to the right shows the proportion of residents aged 3 and over in Redbridge at LSOA level who could not speak English well or at all.

WARD	English is main language	English not main language	
		Cannot speak English well	Cannot speak English
Aldborough	73.7%	3.5%	0.6%
Barkingside	73.4%	3.7%	0.6%
Bridge	87.7%	1.6%	0.2%
Chadwell	80.5%	2.8%	0.6%
Church End	89.9%	1.0%	0.1%
Clayhall	74.0%	3.8%	0.8%
Clementswood	57.4%	7.7%	1.2%
Cranbrook	70.5%	4.5%	0.8%
Fairlop	83.9%	2.2%	0.4%
Fullwell	80.7%	2.9%	0.4%
Goodmayes	66.4%	5.8%	1.2%
Hainault	86.2%	2.0%	0.3%
Loxford	58.6%	7.9%	1.2%
Mayfield	70.6%	5.0%	0.9%
Monkhams	92.3%	0.8%	0.1%

Valentines	65.6%	5.8%	0.9%
Wanstead	89.4%	1.5%	0.2%
REDBRIDGE	75.4%	3.9%	0.7%
LONDON	77.9%	3.5%	0.6%

Ethnicity

The ethnic group classifies people according to their own perceived ethnic group and cultural background. The Simpsons' Diversity Index (SDI) maps ethnic diversity at local authority level for all 18 ethnic group categories for which data is available and generates a score and ranking for each authority. The SDI shows that Redbridge had the fourth most diverse community in England and Wales.

The ethnic make up of Redbridge wards has changed over the last decade with the White (42.5%) and Asian/Asian British (41.8%) ethnic sub-groups each making up a similar proportion of the overall population, whereas in 2001 the White ethnic sub-group made up far more of the population (63.5%) than the Asian/Asian British ethnic sub-group (25.8%). An average Redbridge ward in 2011 was more diverse than an average London ward where the White ethnic sub-group (59.8%) remained more predominant than any of the other ethnic sub-groups (nearest was also Asian/Asian British (18.5%)). In 2001, the White ethnic sub-group was predominant in 17 Redbridge wards, followed by the Asian/Asian British ethnic sub-group in four wards. By 2011 this had changed with the Asian/Asian British ethnic sub-group being predominant in 11 wards, followed by the White ethnic sub-group in 10 wards. Every ward in Redbridge saw a decrease between the censuses in the proportion of residents from the White ethnic sub-group, ranging from 35 percentage points in Chadwell to 10 percentage points in Monkams. At the same time, each ward also saw an increase in the proportion of residents from the Asian/Asian British ethnic sub-group ranging from 26 percentage points in Clayhall to six percentage points in Wanstead. In 2011, the resident population of Clementswood, Clayhall, Cranbrook, Newbury and Valentines consisted of more than sixty per cent of Asian/Asian British people. The table on page 7 provides a breakdown of the change in ethnic sub-group of each Redbridge ward between the censuses.

In 2011, the proportion of people in Redbridge stating their ethnic group as White British (including English, Welsh, Scottish and Northern Irish) was 34.5%, a decrease of 23 percentage points since 2001. Redbridge had the sixth lowest proportion of White British residents out of all London Boroughs, which had an average of 45%. Aside from Caribbean, the number and proportion of all other BME groups grew in Redbridge between the censuses. Redbridge had the highest proportion of Pakistanis (11.1%) of all London Boroughs and ranked seventh highest in the country – Loxford (24.8%) had the highest proportion of Pakistanis amongst Redbridge wards, followed by Clementswood and Cranbrook. Redbridge had the fourth highest proportion of Indians and the third highest proportion of Bangladeshis in London. Valentines (28.8%) had the highest proportion of Indians, followed by Seven Kings whilst Clayhall (9.9%) had the highest proportion of Bangladeshis, followed by Barkingside. The three foremost ethnic groups in an average Redbridge ward remained White British, Indian and Pakistani – the table on page 8 provides a breakdown of the three foremost ethnic groups in each ward at the time of both the 2011 and 2001 census, whilst the table on pages 9 shows the ethnic proportions within each Redbridge ward for the 2011 census.

In 2011, 13 Redbridge wards had a higher proportion of Black and minority ethnic (BME) than White British residents – this was an increase from eight wards at the time of the 2001 Census. Clementswood at 90.6% had the highest proportion of BME residents, followed by Loxford and Valentines. Monkams at 30.2% had the lowest proportion of BME residents. The biggest increase in the proportion of BME residents was seen in Chadwell (37%) followed by Clayhall and Aldborough. Clementswood, Cranbrook, Goodmayes, Loxford, Newbury, Seven Kings and Valentines were all in the highest one per cent of wards in England and Wales for the proportion of BME residents. The table on page 10 provides a breakdown of the change in each ward – there are also maps showing the proportion of BME residents in Redbridge at LSOA level at the time of both the 2001 and 2011 censuses.

The table below shows the change in ethnic sub-group proportions in each ward between the censuses.

Religion

This is a person's current religion; however no determination was made about whether a person was a practising member of a religion. This question was voluntary, and where no answer was provided the response was categorised as 'Not stated'. In 2011, the main religion in Redbridge continued to be Christian (36.8%), followed by Muslim (23.3%) and Hindu (11.4%).

In 2011, Redbridge (36.8%) ranked fourth lowest in England and Wales and below the London average (48.4%) for the proportion of Christians. At 20.7%, Clayhall and Clementswood had the joint lowest proportion of Christians in Redbridge – they are in the lowest one per cent of wards in England and Wales for the proportion of Christians, as are Barkingside, Cranbrook, Loxford, Newbury, Seven Kings and Valentines. Bridge (59.3%) had the highest proportion of Christians in Redbridge, followed by Monkams and Hainault.

In 2011, Redbridge ranked sixth highest in England and Wales at 23.3% for the proportion of Muslims, which was nearly double the London average (12.4%). At 46.0%, Loxford had the highest proportion of Muslims in Redbridge, followed by Clementswood and Valentines – together with Cranbrook they are in the highest one per cent of wards in England and Wales for the proportion of Muslims. At 4.8%, Monkams had the lowest proportion of Muslims in Redbridge, followed by Church End and Bridge.

In 2011, Redbridge ranked fourth highest in England and Wales at 11.4% for the proportion of Hindus, which was more than double the London average (5.0%). At 21.5%, Clayhall had the highest proportion of Hindus in Redbridge, followed by Barkingside and Aldborough – they are in the highest one per cent of wards in England and Wales for the proportion of Hindus, as are Clementswood, Cranbrook, Loxford, Newbury, Seven Kings and Valentines. At 3.5%, Bridge and Wanstead have the joint lowest proportion of Hindus in Redbridge, followed by Hainault.

The proportion of Jewish people in Redbridge declined from 6.2% in 2001 to 3.7% in 2011 but remained above the London average (1.8%). Only Fairlop and Hainault saw an increase between the censuses in the proportion of Jewish people. At 10.5%, Barkingside had the highest proportion of Jewish people, followed by Clayhall and Fullwell – they are in the highest one per cent of wards in England and Wales for the proportion of Jewish people, as are Aldborough, Church End, Cranbrook, Fairlop and Monkams. At 0.2%, Clementswood has the lowest proportion of Jewish people in Redbridge, followed by Loxford and Mayfield.

The proportion of Sikh people in Redbridge increased slightly from 5.5% in 2001 to 6.2% in 2011 and was significantly above the London average (1.5%). At 13.6%, Seven Kings had the highest proportion of Sikhs in Redbridge, followed by Goodmayes and Mayfield. At 0.7%, Bridge has the lowest proportion of Sikhs, followed by Church End and Hainault.

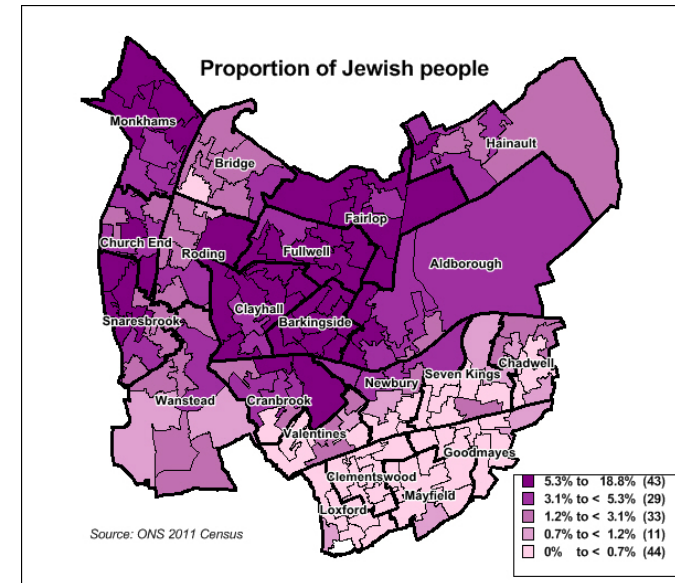

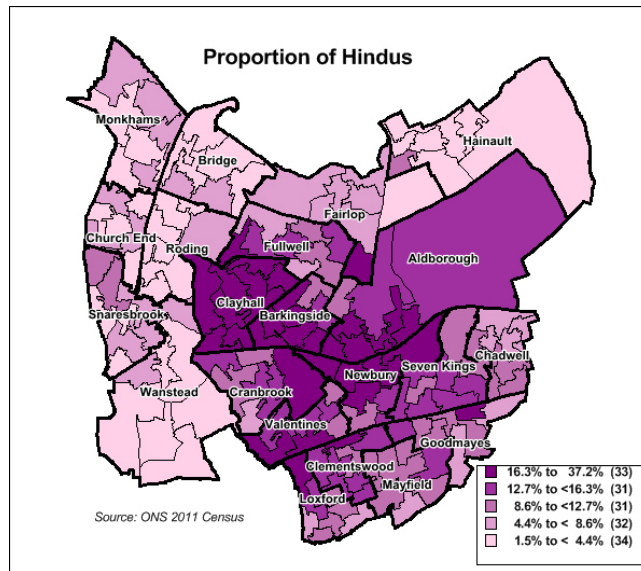

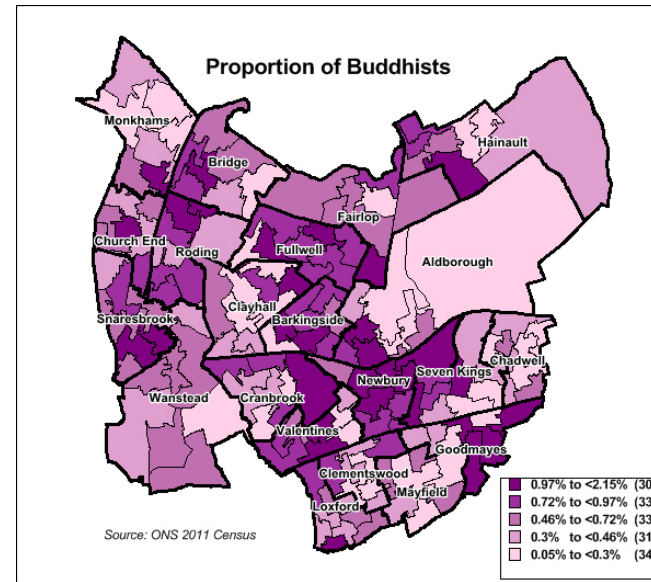

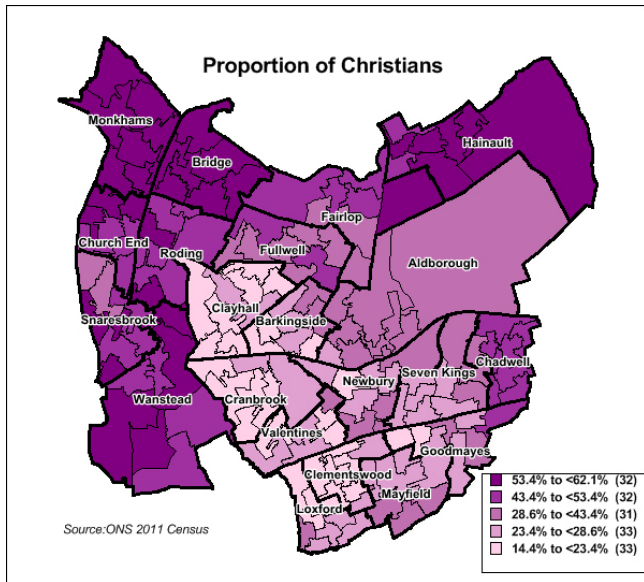

The proportion of Buddhist people in Redbridge nearly doubled from 0.4% in 2001 to 0.7% in 2011 but remained below the London average (1.0%). At 1.1%, Newbury had the highest proportion of Buddhists, whilst the lowest proportion was in Chadwell (0.3%).

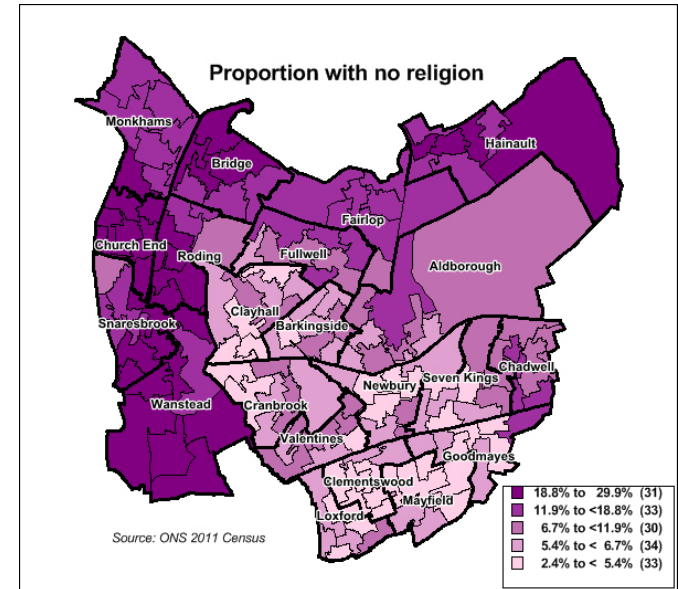

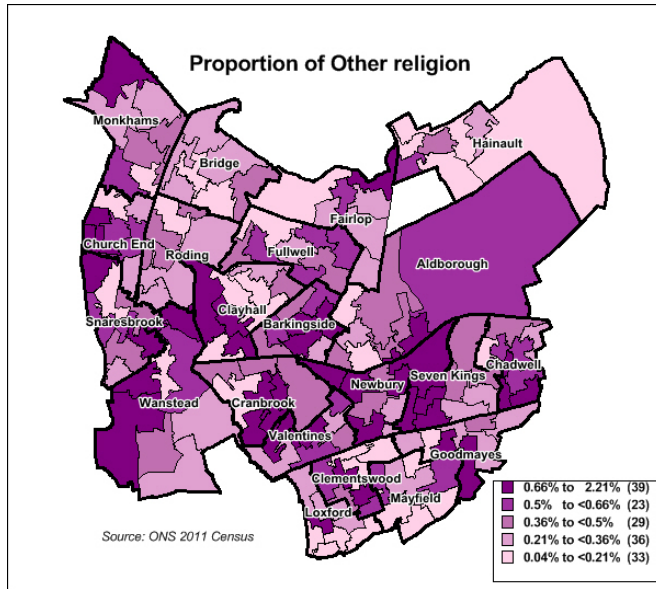

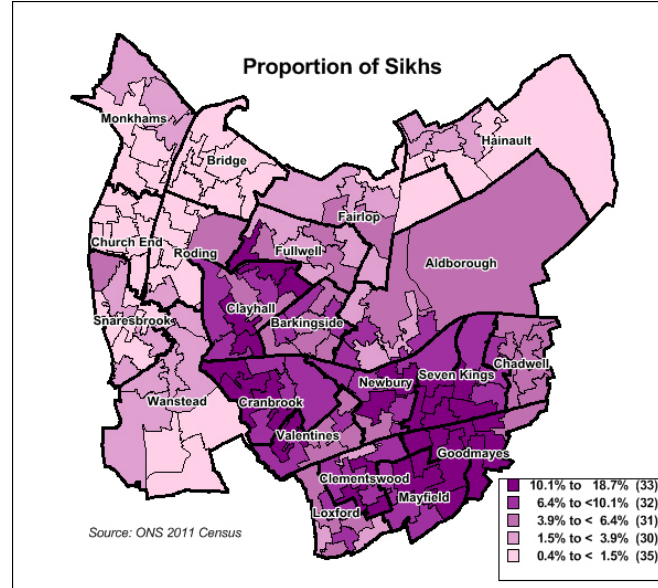

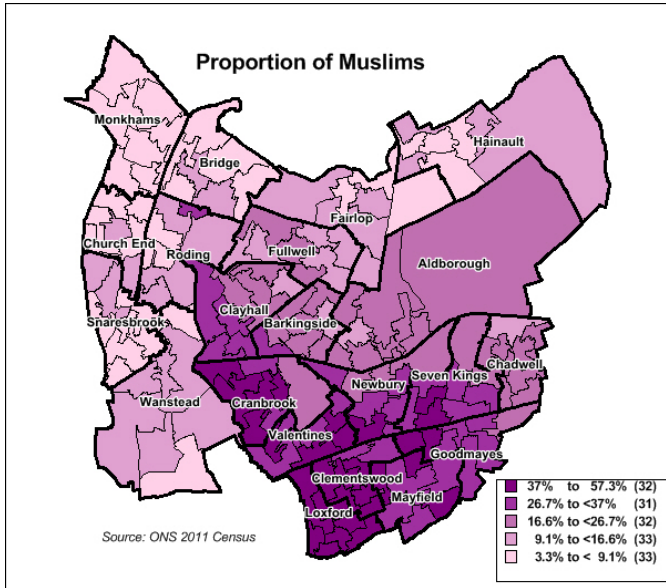

The proportion of people stating 'No religion' in Redbridge increased from 9.6% in 2001 to 11.0% in 2011 but remained below the London average (20.7%) – Redbridge ranked fourth lowest in England and Wales. At 23.4%, Church End had the highest proportion of residents in Redbridge stating 'No religion', followed by Wanstead and Snaresbrook. At 4.4%, Clementswood had the lowest proportion of residents in Redbridge stating 'No religion', followed by Mayfield and Loxford. No Redbridge wards featured either high or low in the rankings for England and Wales or London.

The table below shows the religious proportions within each ward at the time of both the 2001 and 2011 censuses.

WARD	Christian		Buddhist		Hindu		Jewish		Muslim		Sikh		Other religion		No religion		Religion not stated

The maps below and on the next page show the proportion of Redbridge residents at LSOA level for each of the eight religious groups stated in the 2011 Census.

Data sources

2011 Census data (*including this release*) is now also available on the following ONS websites:

- [Neighbourhood Statistics](#) (NESS) where users can choose a local authority, ward, middle super output area, lower super output area output area or Westminster parliamentary constituency and view/download statistics with comparisons against London and England. Neighbourhood summaries are available and users can also simply select full tables of census data for download.
- [NOMIS](#) where users can specify census statistics and then download these at either of the following levels:
 - Local authority
 - Ward
 - Middle super output area
 - Lower super output area
 - Output area
 - Post code area
 - Post code district
 - Post code sector
 - Primary Care Trust
 - Strategic Health Authority
 - Westminster parliamentary constituency

Future releases

On the 19th February 2013 ONS completed the [second release of 2011 Census statistics](#) by issuing the Key and Quick Statistics for National Parks and health areas together with postcode estimates by sex and for the number of households.

The [third release of 2011 Census statistics](#) consisting of multi-variate statistics is scheduled to take place between March and June 2013. Each phase of the third release of data will be via the [ONS](#) website, the [Neighbourhood Statistics](#) website and the [NOMIS](#) website.

Can you please consider if your service has any specific data needs from the second or third release of Census statistics for which you may need our assistance. The Corporate Policy and Performance team are happy to come and meet with you or meet with appropriate colleagues from your area to discuss any data needs.

For further information about upcoming data releases or data analysis please email the Corporate Policy and Performance Team at: jimmy.maravala@redbridge.gov.uk or tony.doherty@redbridge.gov.uk.
